SCSU Community Health Worker Training Program

About the program

SC State University has established a Community Health Worker (CHW) Training Program to recruit, train, and enable the next generation of minority Community Health Workers (CHWs) to address health disparity and improve health equity in rural South Carolina. Recent high school graduates, college students, and community members will be equipped to perform in various health-related settings, such as academia, community, clinics, etc. These participants will acquire core competencies for CHW and the Public Health working environment that follow state, local, and other guidelines to support essential public health services.

Contact Info

Here are all the ways you can contact us:

- Dr. Audrey McCrary-Quarles, PD (amccrar@scsu.edu)
